DROP SHIPMENT UPDATE

Effective immediately, CyberLock will collect a compliance verification fee for **ALL** drop ship requests, including addresses we have drop-shipped to in the past. As a security company, U.S. export regulations impose strict requirements for verifying recipients of our products.

Drop shipments will be subject to a **$35** fee for U.S. addresses, and a **$100** fee for international addresses. Additional fees may apply for high-risk transactions as well as large orders.

Please reach out to sales@cyberlock.com if you have questions.

*Contact your CyberLock representative for details

END OF LIFE NOTIFICATION:
CK-RXD, CK- RXD2 & CK-PLUS

In June of 2020, or until supplies last, CyberLock will **no longer offer the CK-RXD or the CK-RXD2**. The CK-RXD and CK-RXD2 are available in limited quantities while supplies last. If you have questions concerning current Vault 20S users please review the upgrade options document on CyberLockTeam.com.

The **CK-USB was released in July of 2019 and is the ideal alternative for the CK-RXD and CK-RXD2**. The CK-USB includes several upgrades that provide customers with the newest and best smart key technology. With charging available via both the key tip and micro USB port, the CK-USB brings reliability and convenience to the palm of your hand. Not only is the CK-USB convenient to charge, when fully charged the battery typically lasts up to 12 weeks depending on use. Unlike the CK-RXD and CK-RXD2, the CK-USB can keep a record of up to 12,000 audit events, giving customers peace of mind. Finally, the CK-USB has additional LED lights, providing more visibility in ValidiKey vaults and giving customers more feedback on key status. The CK-USB is compatible with both the ValidiKey 20 Vault and the Validikey 2.

If you have questions regarding end-of-life for certain software and hardware products, or compatibility with our latest releases, feel free to reach out to [sales@cyberlock.com.](sales@cyberlock.com)
